2011 George C. Poppensiek
Visiting Professorship in Global Animal Health

Damaged Ecosystems & the Problem of Frogs!

VAL BEASLEY

DVM, PhD, DIPLOMATE, AMERICAN BOARD OF VETERINARY TOXICOLOGY
PROFESSOR OF VETERINARY, WILDLIFE, AND ECOLOGICAL TOXICOLOGY
EXECUTIVE DIRECTOR, ENVIROVET PROGRAM IN WILDLIFE AND ECOSYSTEM HEALTH
DEPARTMENT OF COMPARATIVE BIOSCIENCES
COLLEGE OF VETERINARY MEDICINE

Tuesday, March 1, 2011

6:30 PM

**Veterinary Education Center
College of Veterinary Medicine**

Dr. Beasley will provide insight into direct and indirect effects of changes in ecosystems that are wreaking havoc with the first vertebrates to set up serious housekeeping on land—the amphibians. Included will be ways by which human-induced ecological disruption and contamination may influence infections, malformations, and reproductive success. His presentation will be relevant not only to animals with aquatic and terrestrial lives, but also to other species, including *Homo sapiens*, on a global scale.
